

## PreCast Concrete Structures Ltd

### 2.2 Environmental Policy Statement

The management and all who work at PreCast Concrete Structures Ltd are committed to the care of the environment and the prevention of pollution.

The organisation ensures that all its activities are carried out in conformance with the relevant environmental legislation and the Codes of Practice issued by our Client's, Government bodies and Trade Associations.

The organisation seeks to minimise waste, promote recycling, reduce energy consumption, reduce harmful emissions and, where possible, to work with suppliers who themselves have sound environmental policies.

An essential feature of the environmental management system is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets which are regularly monitored and reviewed. The objectives and targets are publicised throughout the organisation and all staff are committed to their achievement.

The success of the Environmental Policy depends on the managers, supervisors and employees at all levels within the company. The employees will be made aware of what is expected of them by the company and what is required of them by law.

#### Environmental objectives:

- a) ensure the programme is delivered in compliance with the environmental requirements;
- b) promote improvements in environmental management of construction;
- c) implement the waste hierarchy across the programme;
- d) seek ways to minimising environmental impacts.

#### Responsibilities

All employees have a responsibility to accept their personal involvement in the practical allocation of this policy, but specific responsibility falls upon line managers, supervisors, and employees professionally involved in administration and training.

Supervisors are responsible for the day to day environmental issues and for the implementation of all necessary measures to ensure compliance with all statutes and other matters relating to the environment. They shall identify, during the progress of the works, any matters that breach the Statutes. They are also responsible for any sub-contractors employed by the company, to ensure they comply with environmentally friendly practices.

Access will be given to any specialist environmental consultants and any specialist named by a client.

Signed: 

Mr Graham Paddock (Managing Director)
